SUMMARY

Program and product professional who sits at the intersection of engineering and business. 1.4 years governing enterprise SaaS delivery at Synchron Software — owning product lifecycle, KPI frameworks, cross-functional stakeholder alignment, and executive reporting. Dual-degree edge: BTech Computer Science + MBA Finance and Business Intelligence, NMIMS Navi Mumbai. Speaks engineering in the startup and business in the boardroom — without needing translation in either direction.

WORK EXPERIENCE

Associate Technical Program Manager (Synchron Softwares)

Jan 2025 - Apr 2026

- Orchestrate end-to-end program governance for live enterprise products, driving stakeholder alignment, sprint planning, and on-time delivery across distributed cross-functional teams.
- Worked on One Product Version (OPV) cycles, owning legal compliance efforts and technical readiness gates across multiple simultaneous client go-lives.
- Define and monitor KPIs against delivery milestones, sustaining an 80% on-target achievement rate; facilitate risk identification and resolution to maintain programme velocity.
- Collaborated on Cost to serve efforts and PoC process governance, resulting in cross-team alignment and discovery of in-depth business decisions.

Finance and IT Intern (RedHat)

May 2024 - Oct 2024

- Executed fixed-asset reconciliation and audit across the SAANZ region in collaboration with a global team of 80+ finance and IT stakeholders.
- Served as the primary liaison between Accounts and IT, streamlining cross-departmental reporting and contributing to process documentation that improved asset-tracking data hygiene.
- Learned and worked across different finance teams about oracle firebase maintaining payslips, invoices and inconsistent fluctuations across currencies.

PROJECTS

IPO Analyzer

[Link to Demo](#)

Built a full-stack IPO valuation engine integrating NLP-driven news sentiment, RHP parsing, and 15 years of market volatility data to classify offerings as undervalued or overvalued.

Transshipment Optimization - 7 Eleven

Applied linear programming to optimise last-mile logistics for Pune stores, achieving a 30% cost reduction while sustaining supply continuity and cutting delivery lead times.
